CIRCULAR LETTER TO ALL BRITISH COLUMBIA LAND SURVEYORS

Re: Integrated Survey Area Coordinates

NAD 83 coordinates for the Integrated Survey Areas on the attached list have been issued as supplementary certificates and are now or will shortly be of record in the pertinent Land Title Offices and municipalities.

Plans of surveys within Integrated Survey Areas for which NAD 83 coordinates have been issued must be carried out using NAD 83 grid bearings. There will, of course, be a grace period for surveys which are already largely completed. We would urge surveyors to rotate and translate surveys which are not at the draughting stages wherever possible.

Where surveys which were prepared on NAD 27 bearings are submitted to this office or to the Land Title Offices, please include an explanatory note to alert staff and avoid confusion.

Yours sincerely,

D. A. DUFFY
Surveyor General
and Director
